

Global leaders
in Archive & Storage management

The complete turnkey archiving system, designed for use with all major Media Asset and Production Asset Management Systems. No extra hardware, no extra software, no hidden costs. A cost-effective way to start managing your media archive.

SGL FlashPack is a complete archive and content management solution. Everything you need for an integrated infinitely scalable media archive is included: hardware, software, support and integration with your MAM or production system.

At the heart of FlashPack is SGL FlashNet, the foremost content archive and storage management solution available to the broadcast market. FlashPack harnesses FlashNet's power, resilience and scalability, in a compact entry-level solution. It is ideal for broadcasters, sports venues, post-production houses, corporate communications and other organizations needing to start managing their media assets.

Implementation is very straight-forward: it is delivered in two boxes, containing FlashNet on a pre-installed server and a small tape library. An SGL installation engineer will connect remotely to your system to link FlashPack to your MAM or production system and train on its features and functionality. FlashPack is easily manageable by creative professionals, not requiring dedicated IT resources.

FlashPack Benefits

- Aimed at users who require archive management at a lower entry point
- Easy to use system that fits into 3 RU of rack space
- Completely scalable: add disk storage or increase tape storage/drives as storage requirements increase. As always with FlashNet tapes may be externalized with no additional charges to the user other than the additional tapes themselves
- Ships with ALL hardware, software, media, installation, training and 12 months standard support for both hardware and software (the tape library comes with 24 month support)
- Use of LTFS formatted LTO tapes makes archived material highly portable

turnkey archiving
system

- Entry-level solution
- 2 options available
- Completely scalable
- Ships with all hardware and software

**Global leaders
in Archive & Storage management**

The existing FlashPack infrastructure can be used as part of any future expansion, meaning that growth of the archive does not necessarily entail significant outlay on new hardware. Ultimately, the server and library may be incorporated as storage elements in a full FlashNet cluster solution. FlashPack's extensive combination of upgrade paths and hardware recyclability provides significant ROI for all organizations.

FlashPack Options

SGL Single Drive x 10 Slot system

- FlashNet
- Library with 10 tape slots
- 1 LTO-6 tape drive
- 10 LTO-6 tapes (may be LTFS formatted for portability or DR)
- MAM Plug-In
- 9-to-5 Weekday Support
- 1 day remote services

SGL Two Drive x 20 Slot system

- FlashNet
- Library with 20 tape slots
- 2 LTO-6 tape drives
- 20 LTO-6 tapes (may be LTFS formatted for portability or DR)
- MAM Plug-In
- 9-to-5 Weekday Support
- 1 day remote services

The FlashPack complete storage archive addresses the need for a separate, self-contained system providing a price versus performance ratio which lowers of the cost of entry whilst ensuring the key business criteria of future scalability and security.
